

Department of the Army
Office of the Deputy Chief of Staff, G-2
The Pentagon

Lieutenant General Robert W. Noonan, Jr.
cordially invites your organization
to participate in the
Army Intelligence Modeling and Simulation Workshop
13-14 November 2002
Colshire Building
McLean, VA

The purpose of this workshop is to move towards implementation, with your help, of the Army Intelligence M&S Strategy that many of you helped develop at last year's workshop. A key enabler for the Objective Force is Intelligence, Surveillance, and Reconnaissance (ISR). The Army G-2 serves as the ISR integrator on the Army Staff. There are many on-going efforts to model ISR that need to be coordinated and integrated. To that end, we developed this past year a strategy based on the goals and objectives of TRADOC, the Army Intelligence Transformation Campaign Plan (AI-TCP) and the Simulation and Modeling for Acquisition, Requirements, Training (SMART) Execution Plan.

At the end of this workshop, we expect to reach agreement on proposed goals, objectives, tasks, milestones, roles and contributions of every organization with a stake in the success of Intelligence Modeling and Simulation. As a result, we will draft an Army Intelligence M&S implementation plan that supports the integration of ISR and Command, Control, Communications, and Computers (C4) in the Army Transformation Campaign Plan.

I invite you to send a representative of your organization to participate in this very important workshop. Together, we can help transform Army Intelligence and the Army.

ROBERT W. NOONAN, JR.
Lieutenant General, GS
Deputy Chief of Staff, G-2
